LOCAL ORGANIC WASTE MANAGEMENT

STATE OF THE ART

- Food Waste processing capability is limited.
- Anaerobic Digestion & Windrows
- Costs and GHG's produced long distance hauling.

HISTORY

- Collections
- Investigations/Experiments
- Technology
- Solve it for ourselves

ANACONDA SYSTEMS

- Anaconda's proprietary distributed organic waste processing technology
- Low foot print, high throughput, designed for licensing and permitting within urban locations.
- No odours or pests

VANCOUVER FACILITY

THE FUTURE OF ORGANICS PROCESSING

- Distributed model of processing
- Short distance to processing facility
- Contained, high velocity of treatment
- Price correction
- High value and quality output product
